SCOPE **Account Manager**

MONITORING & CONTROLLING
PRINTED OUTPUT AND COSTS

As one of the modules of the PageScope Enterprise Suite, the Account Manager is dedicated to comprehensive print output and cost control.

The PageScope Account Manager provides print-intensive environments with the means to self-assess their print costs and enforce simple cost management procedures such as establishing print budgets and increasing print cost transparency, thus limiting unnecessary printing. In addition to print management, the Account Manager also provides central tracking and monitoring of all copying, scanning and faxing activities.

The Account Manager facilitates cost assignment and chargeback, provides the necessary tools for efficient budget and quota management, and enables detailed output and cost reporting. As a scalable and affordable solution, the Account Manager supports from one to several hundred devices, making this an ideal tool for any enterprise with the need for central output and cost control.

KEY **FEATURES**

◢ Cost assignment & chargeback

– **Automatic tracking:** Via the central counter collection, all copy, print, scan and fax activities can automatically be tracked for users, groups, cost centres or projects.
– **Flexible cost allocation:** Users can be linked to a certain cost centre or can individually select the appropriate cost centre or project before printing.
– **Synchronisation with Active Directory:** The user group structure can be synchronised with the Active Directory including group hierarchies. This enables consistent user administration and account management between existing user directories and the PageScope Account Manager.
– **Accurate print cost calculation:** Multiple pricing tables can be assigned to individual devices or groups of similar devices, allowing the accurate calculation of print costs for a heterogeneous print infrastructure.
– **Print Log Tool:** Print job tracking for non-Konica Minolta printers is supported via this central tool so that the whole printing infrastructure can easily be covered.
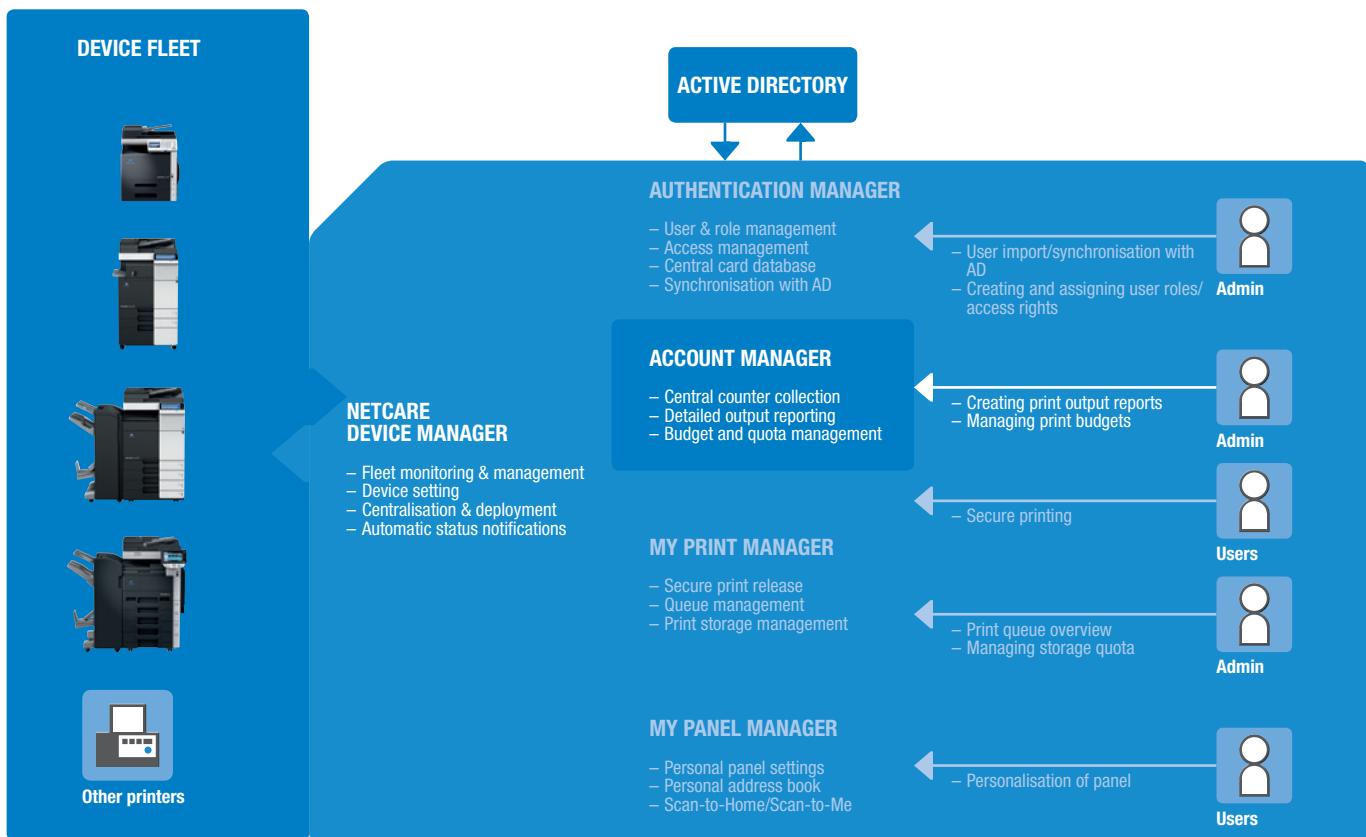

◢ Budget & quota management

– **Flexible quota assignment:** Separate quotas for printing in colour and for black & white printing can be easily assigned to individual users or user groups.
– **Periodical quota reset:** Quotas can automatically be reset on a periodical basis. To enable exceptional printing, the administrator can also manually reset and change quotas.
– **Automatic notification:** The system can be set to notify users automatically when they have reached a certain threshold of their quota (for example 80%) and again when their quota is exhausted.

◢ Detailed output reporting

– **Wizard-based output reporting:** Users can choose from a wide range of parameters and originators.
– **Report creation:** By selecting from more than 30 preconfigured report components, comprehensive output reports in PDF format can be compiled within seconds.
– **Easy cross-referencing:** Cross-referencing between cost centres and users enhances overall transparency.
– **Export of report results:** For accounting purposes, report results can conveniently be exported into various formats (xls, xlsx, csv, xml).
– **Scheduling function:** Reporting can also be automated using this convenient scheduling function.

WORKFLOW

DEVICE FLEET

ACTIVE DIRECTORY

AUTHENTICATION MANAGER
– User & role management
– Access management
– Central card database
– Synchronisation with AD

– User import/synchronisation with AD
– Creating and assigning user roles/ access rights

Other printers

The Account Manager is a module of the PageScope Enterprise Suite and works seamlessly together with its other modules dedicated to end-to-end office print management.

TECHNICAL **SPECIFICATIONS**

SYSTEM REQUIREMENTS

Operating systems	Windows Server 2003, Standard Edition (SP2 or later)
	Windows Server 2003, Standard x64 Edition (SP2 or later)
	Windows Server 2003, Enterprise Edition (SP2 or later)
	Windows Server 2003, Enterprise x64 Edition (SP2 or later)
	Windows Server 2003 R2, Standard Edition (SP2 or later)
	Windows Server 2003 R2, Standard x64 Edition (SP2 or later)
	Windows Server 2003 R2, Enterprise Edition (SP2 or later)
	Windows Server 2003 R2, Enterprise x64 Edition (SP2 or later)
	Windows Server 2008 Standard (SP2 or later) *
	Windows Server 2008 Enterprise (SP2 or later) *
	Windows Server 2008 Standard without Hyper-V (SP2 or later) *
	Windows Server 2008 Enterprise without Hyper-V (SP2 or later) *
	Windows Server 2012 Standard
	Windows Server 2012 R2 Standard
	Windows Vista Business (SP2 or later) *
	Windows Vista Enterprise (SP2 or later) *
	Windows Vista Ultimate (SP2 or later) *
	Windows 7 Professional (SP1 or later) *
	Windows 7 Enterprise (SP1 or later) *
	Windows 7 Ultimate (SP1 or later) *
	Windows Server 2008 R2 Standard (SP1 or later)
	Windows Server 2008 R2 Enterprise (SP1 or later)
	Windows 8 Pro *
	Windows 8 Enterprise *
	Windows 8.1 Pro *
	Windows 8.1 Enterprise *

Memory	3 GB or higher
Hard disk space	500 MB or higher (for initial installation)
CPU	Intel Core 2 Duo E8600 3.33 GHz
.NET Framework	Microsoft .NET Framework 2.0 SP2
	Microsoft .NET Framework 3.5 SP1
	Microsoft .NET Framework 4.0 or later
Internet information services	Microsoft Internet Information Services 5.0 or later
Database server	Microsoft SQL Server 2005 Express/Standard/Enterprise
	Microsoft SQL Server 2008 Express/Standard/Enterprise
	Microsoft SQL Server 2008 R2 Express/Standard/Enterprise
	Microsoft SQL Server 2012 Express/Standard/Enterprise
Supported languages user/admin interface	English, French, Italian, German, Spanish, Czech, Danish, Dutch, Finnish, Norwegian, Polish, Swedish
Supported MFPs	Konica Minolta bizhub MFPs and printers
	Accounting of third party devices supported via Print Log Tool (Total Counters only) or via external terminal (Accounting by user)

The support and availability of the listed specifications and functionalities varies depending on operating systems, applications and network protocols as well as network and system configurations.

* The 32-bit (x86) and 64-bit (x64) editions of Windows are supported.
